Allen Martinez

allen.martinez1010@gmail.com

Education: *California Polytechnic University Pomona* (2014-2018)
Bachelor's Degree in Accounting
Chaffey College (2011-2014) Associates Degree in Business and Technology

Objective: Results-driven professional with experience in fuels pricing and business analysis. Focused on collaborating across teams to improve operational efficiency, maintain and expand strong business relationships and support the continual growth of business operations.

Work History:

Business Operations Analyst (October 2022- Present)
Southern California Edison

- Manage, document and present expense budgets totaling close to $2M for three business units on a monthly basis.
- Project, produce and enter forecasts for future fiscal years communicating with Principal Managers to ensure as accurate an allocation as possible.
- Automated reports, for example, moved manual reporting from Primavera to automatic via SAS-PowerBI.
- Project Managing, facilitated Substation Capacity Analyses by coordinating with Protection Engineering and overcoming previous project stagnation.
- Data driven decision making editing SQL logic to improve and standardize reporting.

Fuel Pricing Analyst (May 2019- October 2022)
Circle K

- Analyzed competitive fuel pricing, market conditions, supply trends and macroeconomic trends to optimize fuel pricing and increase CPG.
- Exceed fuel gallon sales by outperforming EIA estimates by 2%.
- Supported expansion into Oregon and Washington by coordinating market setup, competitive fuel pricing and operational requirements for the operations team.
- Helped organize and collect state specific data for tax accounting purposes.
- Through guidance from my director and Kalibrate/PDI set up fuel pricing software to implement and trigger the first ever Premium Thursdays.

Skills:

- Cost Analysis
- Excel (Pivot tables, Financial Modeling)
- Variance Analysis and Financial Forecasts
- Collaboration across teams
- Data driven decision making
- Process optimization
- Presenting and communicating with management
- Prompt engineering and applied AI tools
